

SPACE TIME

Every day in space a star dies.

But every day I break the laws of physics so much that I got punished from something.

I don't no if there are gods of space that punished me or not but I'm going to tell you what the punishment is.

The punishment is when ever a star dies I get sent to a different dimension.

For example I might get sent inside a TV witch is forth dimension but getting sent to different dimensions hardly happens.

But every day I break the speed of light jest exploring space it's really fun most of time until get sent to a different dimension.

But going into space is hard.
It's hard to breath it's hard to do anything.

And I forgot to tell you when I die,for example like when I get sucked into a black hole I get sent into a different dimension.

Now let's get started I have to protect something called a gravity core it can save you from stars black holes and getting sent into orbit from stars and planets.
I use the gravity core all the time because I don't like getting sent to different dimensions.

I can protect the gravity core by putting it in my pocket.

If you are wondering how I travel at the speed of light I will tell you. I travel at the speed of light with 6 anti gravity jets so can launch out of orbit from stars it's actually reverse gravity.

Okay now let's really get started I landed on a planet...a giant planet and there were also living beings that can also travel at the speed light. Now I'm really in trouble but that's what I thought I didn't no that I died so I got sent to a dimension without realizing I was sleeping when it happened.
